

But while

Psychology concerns itself with conduct towards the world, ~~but~~
essential philosophy concerns itself with the ~~conduct of~~ mental
processes as they ^{apply} ~~conform~~ to themselves and to each other's reality
~~of~~ extrinsic conditions. ^{as it studies} ~~But mental processes~~ as they apply

to themselves, it must also study Mind for this is to what they
ultimately apply. And if philosophy studies the extrinsic
conditions of the ~~relative~~ mind, it must also ~~investigate~~
Mind - for it is ^{up to} ~~the~~ clear ~~that~~ the visible ~~events~~ ~~rests~~.
